

33-6631

Lightweight FR backed
cut resistant leather glove

The 33-6631 is the next generation FR backed leather palm glove. Based on a lighter weight liner than usually associated with leather gloves it has a greater level of dexterity and flexibility. FR fabric to the back of the hand protects from weld spatter and small molten metal droplets. The leather wrap to the palm and fingers provides reinforced protection where needed most whilst still providing a light, soft, comfortable glove suitable for long periods of wear.
